Note: The syllabus is subject to change in the future.
SYLLABUS GOALS AND OBJECTIVES

The Casualty Actuarial Society has as one of its primary objectives the development of qualified professionals in the field of casualty actuarial practice. The Casualty Actuarial Society conducts an educational and examination program for prospective members in order to achieve this objective. The syllabus goals and objectives follow:

1. To develop a general understanding of the social, political, regulatory, legal, and economic environment of the business of property and casualty insurance and the historical development of that environment.

2. To develop a thorough understanding of the fundamental mathematical concepts applicable to solving insurance problems and a high degree of skill in their applications.

3. To develop a comprehensive understanding of the business of property and casualty insurance, including underwriting, claims, marketing, finance and how these functions are performed and relate.

4. To develop a working knowledge of insurance policies and contracts.

5. To develop an expert knowledge of a broad range of techniques to solve insurance problems and to develop the ability to discern the appropriateness of techniques for particular applications based on a knowledge of the assumptions, strengths and weaknesses.

6. To develop an expert knowledge of a broad range of relevant and standard actuarial practice, in order to present a framework for the use of problem solving techniques.

7. To encourage a sense of inquisitiveness and creativity towards insurance problem solving in order to foster an appreciation of the art in actuarial science.

RULES REGARDING EXAMINATIONS FOR ADMISSION

1. Dates of Examinations
   Exact starting times will be announced.

   Part 1
   Date of 1992 Examinations
   1 (SOA Course 100) ....... February 11, May 12, November 10*
   2 (SOA Course 110) ....... February 11, May 12, November 10*
   3A (SOA Course 120) ....... May 19, November 17*
   3B ................................ May 4, November 4
   3C (SOA Course 135) ....... May 19, November 17*
   4A ................................ May 6, November 2
   4B ................................ May 6, November 2
   5 .................................. November 6
   5A ................................ November 6
   5B ................................ November 6
   6 .................................. May 8
   7 .................................. November 5
   8 .................................. May 5
   9 .................................. November 4
   10 ................................ May 7

* All information for Parts 1, 2, 3A, 3C (SOA courses 100, 110, 120, 135) is tentative for November, 1992. Final SOA Syllabus reflecting any changes in dates, fees, and content will be published in May, 1992 and distributed coincident with transmittal of grades to all candidates registered for Parts 1 through 3 in May, 1992.

NOTE: Changes in Part 3 and Part 5 Examinations

Beginning in November, 1990, Operations Research is no longer a required topic for CAS students. It has been replaced by Finance, which is an increasingly important topic for actuaries.

To accomplish this, and some other goals, there has been a realignment of the Part 3 and Part 5 examination topics beginning in November, 1990. After May, 1990, SOA Course 130 (formerly CAS 3b), Operations Research, is no longer sponsored by the CAS. In its place, a new examination part, Introduction to Property and Casualty Insurance, denoted as Part 3B, is offered. This examination part covers property and casualty coverages, operations, and an introduction to ratemaking and reserving.

Coverages and Operations are no longer tested on Part 5. A section on Finance has been added instead, based in large measure on an MBA level textbook.
Transition Rules

Students who have received credit for Parts 3b and 5 on or before the May, 1990 examinations have credit for the new Parts 3B and 5.

Students with credit for Part 3b, Operations Research, but not Part 5, after the results of the May, 1990 examinations, are given credit for Part 5B: Finance. They do not have credit for the new Part 3B.

Students with credit for Part 5 but not Part 3b prior to the November, 1990 examination receive credit for Part 3B and Part 5A. The credit for Part 5A (without 5B) and Part 5B (without 5A) will no longer expire in 1992. Credit for Part 3B will not expire in 1992.

Only students with credit for either Part 5A or Part 5B after the results of the May, 1990 examinations are allowed to take the Part 5B or 5A examination, respectively, in 1992. All other Part 5 students have to take the entire examination, which is comprised of Parts 5A and 5B, in 1992.

Part 5A: Economics and Risk Theory, Part 5B: Finance, and the entire Part 5 are given in 1990, 1991, and 1992. Beginning in 1993, Parts 5A and 5B will be given in May and November; the entire Part 5 will no longer be given.

Examination centers are listed on the application and are administered in such cities as will be convenient. The Vice President-Admissions will announce the exact times and locations at which the examinations will be given.

Individual consideration will be given to providing special arrangements for persons with demonstrable physical impairments which would impose a severe handicap if examinations were taken under normal conditions. Advance notice that special arrangements will be needed must be given to the Office of the Society when applying to write an examination.

2. Filing of Application

a. Parts 1-3 (excluding Part 3B)

NOTE: Part 3B applications will no longer be processed by the Society of Actuaries.

A candidate who wishes to take one or more of Parts 1 (SOA Course 100), 2 (SOA Course 110), 3A (SOA Course 120) and 3C (SOA Course 135) must file an application form which may be obtained from the office of the Casualty Actuarial Society. For these Parts, application forms and the appropriate examination fee, in check, draft, or money order must be made payable to and sent to the Society of Actuaries at the following address:

Society of Actuaries
P.O. Box 95668
Chicago, IL 60694 USA

The applications for Parts 1-3 (excluding 3B) must be received by the Society of Actuaries by December 20 for the February Part 1 and Part 2 examinations, by March 20 for the May examinations and by September 20 for the November examinations.

b. Parts 3B, 4-10

All candidates filing for an examination(s) must submit an application each examination period. Application forms are enclosed in the Syllabus.

Note: This is a change from past practice.

Each application along with the appropriate examination fee, in check, draft, or money order payable to the Casualty Actuarial Society must be sent to:

Casualty Actuarial Society
P.O. Box 425
Merrifield, VA 22116-0425

The application for Parts 3B, 4-10 must be received by the Vice President-Administration by March 20 for the May examinations and by September 20 for the November examinations.

Candidates will receive an acknowledgement of receipt of their application beginning March 1 for the May examinations and September 1 for the November examinations.

3. Joint Administration

The examinations for Parts 1, 2 and 3A, C are jointly administered by the Casualty Actuarial Society and The Society of Actuaries.
The CAS is a joint sponsor of the prizes awarded for the highest scores on the Part 1 examination.

4. Associateship and Fellowship Examinations

Successful completion of, or credit for, Parts 1 through 7 is required to fulfill the examination requirements for Associateship. Parts 1 and 2 are the same as the Society of Actuaries Course Exam numbers 100 and 110 respectively. Part 3 is administered as three separate examinations corresponding to each subpart. Subparts 3A and 3C are the same as the Society of Actuaries Course Exam numbers 120 and 135, respectively. The Casualty Actuarial Society does not grant credit for SOA Course Exam 130 (formerly CAS Part 3b) if passed subsequent to May, 1990. (See Rule 1 for further explanations.) Each subpart may be taken on separate examination dates such that partial credits are earned until all sections are passed.

Successful completion of, or credit for, all ten examination Parts is required to fulfill the examination requirements for Fellowship. Part 8 now has two subdivisions covering either United States or Canadian specific material and is considered completed based on either one of the two tracks.

5. Fees

The examination fee schedule for 1992 at time of publication is as follows:

<table>

</tbody>
</table>

* For each part
† Candidates taking these parts must submit an application to both the SOA and CAS. The fee for 3B is $40.00 and should be paid to the CAS.

The above fees may change in the future.

The fee structure for Part 3 is based on a candidate fee of $40.00 regardless of the number of sub-parts taken in one sitting plus $30.00 ($20.00 for FTCS) for Part 3A, $40.00 ($30.00 FTCS) for Part 3B, and $20.00 ($13.00 for FTCS) for Part 3C.

Candidates writing any of the examinations for Parts 1, 2, 3A, 3C overseas or at a specially arranged center must pay an additional $35.00 per examination session (February, May or November).

Please note that all fees are payable in U.S. funds by check, draft, or money order.

6. Late Registration, Refunds, and Transfers of Fees

Parts 1, 2, 3A, 3C If the application and regular fee are not received on or before March 20 for the May examinations or September 20 for the November examinations, any candidate wishing to write an examination in North America must pay a late registration fee of $40.00 in addition to the examination fee. Late registrations will not be accepted from candidates writing outside North America. In no case will applications be accepted after April 15 for the May examinations or after October 15 for the November examinations.

For the February administration of Part 1 and Part 2, the registration deadline is December 20. After December 20, any candidate wishing to write Part 1 or 2 in February must pay a late registration fee. No applications will be accepted after January 15. Due to the January release date for November examination results, candidates who wrote the November, 1991 Part 1 or 2 examination may register until January 15 without assessment of a late registration fee. Similarly, candidates who write Part 1 or 2 in the February session may register until April 15 for the May examination session without assessment of a late registration fee. Candidates who wish to apply for Parts 3B, 4-10 and wrote Part 1 or 2 in February may register until April 15 for the May examinations without assessment of a late fee.

A registered candidate who requests a change in examination center must pay a $20 change-of-center fee. No change in center may be made after January 15 for the February examinations, April 15 for the May examinations or October 15 for the November examinations.

If a request for late registration or change of center occurs, the Society will make every effort to have the candidate's records and supplies on hand at the appropriate center in time for the examination. If this effort fails, however, the Society and any joint administering or sponsoring organization are not responsible. If either the candidate's registration and fees or request for change of examination are received so late that it is not feasible to arrange for the candidate to write the examination, the fees will be refunded. The administering organizations are not responsible for difficulties caused by postal service delays or inadequate postage.

A candidate who submits an application for any of Parts 3A or 3C and subsequently does not write one or more of these sub-parts should request an examination fee refund. This request must reach the Society no later than June 30 for a May examination or December 31 for a November examination. Later requests will not be considered. A $40 refundable fee per examination is assessed for all refunds. Therefore,
no refund is made unless the total fees for sub-parts not written exceed $40. The $40 candidate fee is refundable only if the candidate does not write any sub-parts for which the fee is charged. Only examination fees for Parts 3A, 3B and 3C are refundable. Late registration fees, change-of-center fees and fees for writing overseas or at specially arranged centers will not be refunded in any case.

Parts 3B, 4-10. Examination fees are payable each time the candidate registers for an examination. Check, draft or money order in U.S. funds payable to the order of the Casualty Actuarial Society must be received by the Office of the Casualty Actuarial Society by March 20 for the May examination or by September 20 for November examinations. Late registration will be accepted through April 15 and October 15 if accompanied by a $50.00 late registration fee for each part. Change-of-center fees will be $20.00.

The same administrative conditions apply for changes of examination center and for late registration as for the first three exams, with the organization to be contacted being the Casualty Actuarial Society.

A candidate who has filed an application and finds that it will not be possible to take the examination should request a refund of the examination fee. This request must reach the Office of the Casualty Actuarial Society not later than April 15 for the May examinations or October 15 for the November examinations. Later requests will not be considered. A fee of $20.00 per examination will be assessed for all refunds. The fee of a candidate who is unavoidably absent from an examination will, upon written request within 30 days following the date of such examination, be transferred to any examination given in the next thirteen months. A fee which has been so transferred is not refundable. There will be a $20.00 fee for such transfer, payment for which should accompany the request for transfer. Candidates must register for the examination to be taken even if the fee is being transferred from a prior examination period.

7. Waiver of Examinations for Associateship

Waiver of individual examination requirements will be granted by the Board of Directors of the CAS in instances where an applicant has passed or received credit for examinations sponsored by another recognized actuarial organization covering equivalent material in both subject and depth. The granting of waivers by the Board will be based on the recommendation of the Vice President—Admissions. His or her recommendation will be guided by the policy established by the Education Policy Committee.

The Casualty Actuarial Society will not generally grant waiver of all or any portion of its examination requirements for either work experience, contribution to the actuarial literature, academic courses of study, or examinations of non-actuarial organizations. Individuals who claim competence in the areas covered by the examinations should not have difficulty demonstrating their competence through the examination process.

The Education Policy Committee has established the specific program outlined below, covering the most common requests for waiver of examination requirements.

1. Waiver of examination Part 1, 2, 3A, or 3C will be allowed for a candidate who has passed or been credited with the corresponding examinations sponsored by the Society of Actuaries prior to the joint administration of those examinations.
In such instances candidates should present their request to the Vice President—Admissions and include with their applications evidence that demonstrates the asserted equivalence of the actuarial examinations passed to those for which a waiver is requested via a list of topics covered, or other relevant material. If such evidence is not included, the Vice President—Admissions will request it from the candidate. In such instances the Vice President—Admissions will forward the request to the Education Policy Committee. The Committee will then review the request.

For recognized actuarial organizations outside of the U.S. and Canada which have formal education requirements, but whose only means of qualification are through academic achievement, requests for waivers would be reviewed on a case-by-case basis to determine if any credit should be given based on the equivalence of the subject matter with any CAS examinations or parts thereof.

In such instances candidates should present their request to the Vice President—Admissions and include with their applications evidence that demonstrates the asserted equivalence, as well as the appropriate educational policy material of the local actuarial organization. If such material is not included, the Vice President—Admissions will request it from the candidate. For these type requests the Education Policy Committee will be asked to determine whether sufficient equivalence exists to permit granting any examination waiver.

8. Conduct of Examinations

The examinations are exclusively in writing. Except as is noted in the following paragraphs, no books, papers, typewriters, slide rules, or electronic mechanical aids to computation of any kind may be brought into the examination room by candidates, nor may any candidate communicate with or obtain any assistance from any other candidate during the examination.

Electronic calculators will be allowed in the examination room for all examinations. For Parts 1-3 (A, C), 4A, the only acceptable calculator is the one sold by the Society of Actuaries. Calculator orders should be placed with the Society of Actuaries at the same time that the examination application is submitted. No calculators will be shipped after January 15 for the February examinations, April 15 for the May examinations, or October 15 for the November examinations. For Parts 3B, 4B, 5-10, the official calculator of the Society of Actuaries may be used. Other electronic calculators, which are to be supplied by the candidate, must meet the following standards to be acceptable:

1. Portable and silent;
2. Battery operated during examination;
3. Must not be programmable.

A calculator with a power key ($y^x$) is highly recommended.

It is the candidate's responsibility to see that the calculator used during the examination meets the applicable standards and is in good working order.

Parts 1, 2, and 3 (A, C) consist entirely of multiple-choice questions. On these examinations each multiple-choice problem presented includes five answer choices identified by the letters A, B, C, D, and E, only one of which is correct. A separate answer sheet provides a row of six ovals for each problem. The first five of these, identified with the letters A, B, C, D, and E, correspond to the five answer choices. The sixth oval (described below) is marked "Omit." After deciding which answer is correct, the candidate should blacken the oval which has the same letter as this answer.

Since the answer sheets are scored by optical scanning equipment, it is important that there be only one oval blackened for each question. If the candidate decides not to respond to a question for which an oval has already been blackened, the answer oval should be erased, and the "Omit" oval should then be blackened. This oval is located to the right of the answer oval. This procedure assures that the scanning equipment will score the question as an omitted question and not be confused by an incompletely erased answer oval. It is not necessary to blacken the "Omit" oval if no answer oval has been blackened. This is because the scanning equipment also scores a question as an omitted question if there are no ovals blackened in the row. Please note that the "Omit" oval appears on the answer sheets for Parts 1-3 (A, C) only.

9. Grading of Examinations
a) Multiple-Choice and True-False Questions

Scoring of the multiple choice examinations will be done in such a way that there is no advantage or disadvantage to be anticipated from guessing answers in a purely random fashion as compared with omitting the answers entirely.

Parts 1-3 (A, C). There will be one-fifth point added for each multiple-choice question left blank.

Parts 3B, 4-10. There will be no addition for multiple-choice questions left blank, but one-quarter of the point value for each question will be deducted for each incorrect answer. On true-false questions, the point value of the question will be deducted for each incorrect answer.

b) Determination of the Pass Mark

The final decision as to where the pass mark shall be set is arrived at by consultation among the Vice President—Admissions, the Officers of the Examination Committee and the Part Committee. In determining the pass mark, consideration is given both to the performance level of candidates' answers and to the comparative difficulty of the examination, in relation to that of previous examinations. Appropriate recognition is given to any peculiarities that may appear in connection with the answers to any question on an examination despite all the care taken in setting the examination questions.
c) Defective Questions

Occasionally, through error or because of varying interpretations, a question appearing on the examination is found to be ambiguous. If you feel a question is ambiguous, you must bring this to the attention of the Casualty Actuarial Society in writing within two weeks after the date the examination was administered. Your letter should give detailed reasons why you feel the question is ambiguous. The Examination Committee will investigate all questions brought to its attention in this way, and may make allowance in the grading process for answers which could be correct under an interpretation other than the one anticipated in setting the question. Any correspondence on questions which does not reach the CAS office within two weeks will be disregarded for grading purposes.

d) Candidates’ Requests for Information

Any unsuccessful candidate for Parts 3B, 4-10 can get an analysis of his or her test paper by writing to the CAS office before the deadline. The normal deadline will be August 15 on May examinations and February 15 on November examinations. The candidate should provide his or her candidate number. The requests will be batched. The batched requests will go to the Examination Committee about two to four weeks after the deadline. Candidates should receive an analysis normally within two months after the deadline.

The analysis will give an outline of the subject areas in which the student was strong or weak as well as the specific question numbers (on essays) on which he or she scored well, poorly, or in-between. The Examination Committee feels that this kind of information can be developed within a reasonable amount of time and without undue effort. It should provide the educational guidance that most candidates desire.

The Examination Committee is also prepared to do an administrative check for any candidate who appeals a score, to be sure that he or she has been given the proper grade.

10. Confidentiality of Examination Records

The fact that a candidate has passed a particular examination is considered public knowledge. Any further information as to examinations taken by candidates and grades received by candidates is available only to the candidates themselves and to committee chairmen as required for their committee purposes, unless the candidate requests in writing that such information be provided to someone else.

11. Disciplinary Action

Candidates for the Casualty Actuarial Society’s examinations are expected to follow the rules and procedures included in the “Instructions to Candidates” printed on their examination books and announced by the supervisors at the examination locations. These standards may seem stricter than those which candidates are accustomed to in other examination environments. The Casualty Actuarial Society maintains these strict standards because the examinations are such a significant part of a candidate’s career. Therefore, equitable administration of the examinations and enforcement of the highest standards of conduct cannot be emphasized too strongly.

Candidates should understand that the Casualty Actuarial Society will pursue any evidence of a candidate not adhering to the spirit of the examination rules and will respond to violations with appropriate disciplinary action.

12. Associatehip Requirement—Seminar on Professionalism

In addition to the examination requirements for Associatehip, beginning with the November, 1991 administration of exams, all prospective Associates will be required to attend and successfully complete a seminar on professionalism prior to admission as a member. This seminar will be administered by the CAS at times and places to be announced. Eligibility for attendance is defined as having successfully completed five Associatehip examinations. (Parts 3A, 3B, 3C comprise one examination.)
PUBLICATIONS OF THE SOCIETY

The Proceedings and other publications of this Society that are not out of print may be purchased at the prices given below. The volumes and the indexes are uniformly bound in buckram.

Proceedings:
- Single Bound Volumes: $30.00
- Index Vols. XXXI to XL: 1.00
- Index Vols. LI to LX: 6.50
- Index Vols. LI to LXX: 13.00
- Index Vols. LI to LXXV: 30.00

Discussion Paper Programs:
- 1982—Pricing, Underwriting, and Managing the Large Risk: 15.00
- 1984—Financial Solvency: 10.00
- 1986—Reinsurance: 20.00
- 1988—Evaluating Insurance Company Liabilities: 30.00
- 1989—Valuation Issues: 30.00
- 1990—Pricing Issues (2 Vols.): 40.00
- 1991—International Topics: 30.00

Yearbook: 20.00

Syllabus of Examinations: No Charge

The Actuarial Review (Annual Subscription): 5.00

Bibliographies: 15.00

Foundations of Casualty Actuarial Science (Textbook): 75.00

Report on the Annual Statement: 6.00

An Introduction to Credibility Theory: 3.00

Various Study Notes and Study Kits: See This Syllabus of Examinations

Actuarial Forum (per book): 30.00

Statement of Principles Regarding Property and Casualty Insurance Rate Making: 4.00

Statement of Principles Regarding Property and Casualty Loss and Loss Adjustment Expense Reserves: 4.00

Statement of Principles Regarding Property and Casualty Valuations: 4.00

The following schedule comprises a list of cloth-bound volumes of the Proceedings that are not out of print and are available for sale.

LIBRARY

All candidates registered for the examinations of the Casualty Actuarial Society and all members of the Casualty Actuarial Society have access to all the library facilities. The CAS Library is located at Suite 600, 1100 North Glebe Road, Arlington, Virginia, 22201.

Books and manuals may be withdrawn from the library for a period of one month without charge. In general, not more than two references may be in the hands of a borrower at one time.

Address requests for books to:
Casualty Actuarial Society
Library Service

AMERICAN ACADEMY OF ACTUARIES

Satisfactory completion of specified examinations of the Casualty Actuarial Society will satisfy the educational requirements for admission to the American Academy of Actuaries. The Academy has continuing education requirements. For further information contact the Academy at Suite 800, 475 N. Martingale Road, Schaumburg, Illinois 60173-2226.

*Jointly administered with the Society of Actuaries

**Candidates must specify the United States or Canadian specialty at the time of application.

RECOMMENDATIONS FOR STUDY

The objective of the Casualty Actuarial Society's education and examination process is to assist the candidate in professionally preparing for an actuarial career of managing the varied corporate responsibilities assigned to an Actuary in the casualty insurance field. The Recommendations for Study present the study material that a casualty actuarial candidate should understand thoroughly, and be able to apply professionally to actual casualty insurance situations. The examination process is designed to assure that each successful casualty actuarial candidate attains a satisfactory level of competence in the subject matter.

The examinations for admission to the two grades of membership in the Society are designed to establish the qualifications of candidates. The following Recommendations for Study are provided as a guide for the candidates in their preparation for the examinations. It should be realized that although the examination questions will be largely based upon the textual material cited, they will not necessarily be drawn directly therefrom. The examinations will test not only the candidate's knowledge of the subject matter, but also the candidate's ability to apply that knowledge. Finally, in the development of the syllabus readings and the examination questions, it is assumed that the candidate is familiar with the material covered in earlier parts. Therefore, it is recommended that the candidate take the parts in numerical order.

In their study for the mathematical sections of the Associateship Examinations, candidates are advised to work out as many examples as possible in order to acquire facility in the application of the mathematical principles and methods to specific problems. The questions on the examinations for Parts 1-4 are all of the multiple choice type.

In preparing for Parts 8 and 10, the candidate should become familiar with current developments by reading property and casualty insurance articles for the indicated period.

The references to papers in the Proceedings of the Casualty Actuarial Society (PCAS) are considered to include all cited discussions of these papers. In the case of readings from out-of-print Proceedings, the candidate is responsible only for those discussions reprinted in the Study Kits.

A more detailed identification of the text references cited in the examination part descriptions will be found in the index to text references at the end of these Recommendations. The reading materials suggested in these Recommendations are designed to acquaint the candidate with the respective subjects and should not be interpreted as representing views endorsed by the Casualty Actuarial Society.

If a new edition or printing of any text becomes available, the student should contact the CAS office for instructions regarding its acceptability and the appropriate chapters/pages in the new edition which correspond to the printed study requirements.

A dagger (†) beside a reading indicates that it is either an addition to the recommended readings or that there has been a material change to a previously included reading. A dagger (†) beside the part number for a Study Kit indicates that there is new material available this year.
ASSOCIATESHIP EXAMINATIONS

PART 1
CALCULUS AND LINEAR ALGEBRA—SOA Course 100

This Examination Part is jointly administered by the Casualty Actuarial Society and the Society of Actuaries.

The three-hour multiple-choice examination is based on material usually covered in undergraduate mathematics courses through the differential and integral calculus and a first course in linear algebra. The general scope of the examination is indicated by the following topics:

- Real and complex numbers;
- Elementary set theory, including unions, intersections, and complements;
- Functions, equations and inequalities;
- Analytic geometry of two and three dimensions;
- Standard algebraic and transcendental functions, including polynomial, rational, trigonometric, logarithmic, and exponential functions;
- Limits, continuity, differentiability, and integrability;
- Derivatives, integrals, and partial derivatives;
- The fundamental theorem of integral calculus;
- Applications of derivatives and integrals, including multiple integrals;
- Infinite and infinite sequences and series, including the Taylor series expansion;
- The mean value theorem;
- Linear equations, vector spaces and generating sets;
- Bases, dimensions, and subspaces;
- Scalar products, linear transformations, and kernel and image space;
- Matrices, determinants, eigenvectors and eigenvalues.

Candidates who have not had mathematics courses covering these topics may be helped by either of the texts covering calculus and analytic geometry and either of the texts covering linear algebra listed below. These may be considered representative of the many texts used in colleges and universities in the United States and Canada which adequately cover the material upon which the candidate may be examined. Earlier or later editions of the texts listed below contain essentially the same information, and should be adequate for review purposes.

PART 2
PROBABILITY AND STATISTICS—SOA Course 110

This Examination Part is jointly administered by the Casualty Actuarial Society and the Society of Actuaries.

The three-hour multiple-choice examination is based on material usually covered in undergraduate courses in mathematical probability and statistics. It can be taken by candidates who have had thorough college courses in these subjects or by persons who have done concentrated reading in these fields. The general scope of the examination is indicated by the following topics, which are among those proposed for a one-year college course in probability and statistics by the Committee on the Undergraduate Program in Mathematics (CUPM) of the Mathematical Association of America:

- Sample spaces;
- Axioms and elementary theorems of probability;
- Independence, conditional probability, and Bayes’ theorem;
- Permutations and combinations;
- Random variables;
- Binomial, Poisson, normal, chi-square, t, F, and other probability distributions;
- Expectation, mean, variance, and moment generating functions of probability distributions;
- Multivariate distributions;
- Transformations of random variables;
- Conditional and marginal distributions;
- Central limit theorem;
- Point estimation, including maximum likelihood estimation and the application of criteria such as consistency, unbiasedness, and minimum variance;
- Tests of statistical hypotheses, including power functions, Type I and Type II errors, Neyman-Pearson lemma, and likelihood ratio tests;
- Applications of sampling distributions to confidence intervals and to tests for means and variances;
- Regression and correlation;
- Method of least squares;
- Interpretation of experimental results;
- Bayesian estimation.

The CUPM has reported that statistics courses can be implemented in a variety of ways, and can include different topics with different emphases on these topics. That widely divergent approaches are acceptable is illustrated by the many texts appropriate for a one-year college course. Among such texts, the following are representative of those which cover most of the above topics and which provide the mathematical background required for this examination.

Candidates who have mastered the text material and can work the problems in any one of these references should be adequately prepared to handle the mathematical material in this examination.

The following page references to the representative texts listed above are provided to assist candidates in locating some of the appropriate background material for a few selected topics that are included in this examination:

**Moment-generating functions of probability distributions:**
- 3. pp. 78-81 and 538-543.

**Applications of chi-square distribution (chi-square tests):**
- 1. pp. 269-283 and 312-313.
- 2. pp. 91-99 (Volume II).

**Regression and correlation:**
- 1. pp. 73-78, 117-120 and 296-303.

**Bayesian estimation:**
- 2. pp. 36-42 (Volume II).

It will be assumed that the candidate is familiar with the ordinary deck of fifty-two playing cards and the ordinary six-faced die.

**PART 3 (A, C)**

Part 3A and 3C are jointly administered by the Casualty Actuarial Society and the Society of Actuaries.

The Casualty Actuarial Society will not grant credit for Part 3b (SOA Course Exam 130) if passed subsequent to May, 1990.

This examination is administered as two separate examinations corresponding to each subpart as listed below. Part 3B replaced part 3b beginning in November, 1990. (See “Rules Regarding Examinations for Admission” on page 3.) Parts 3A, 3B and 3C may be taken on separate examination dates such that partial credits are earned until all sections are passed.

For many candidates, Part 3 is the first actuarial examination for which they will be preparing without the benefit of a formal course in the subject material. These candidates will find it helpful to maintain contact with other Part 3 candidates and to take advantage of opportunities to discuss with others questions that are considered difficult. Candidates should not hesitate to consult members of the profession in their own organizations or elsewhere who are knowledgeable on these subjects.

Study notes are available for each part from the Society of Actuaries at a charge. The Study Notes for the May examinations may be ordered after January 1; those for the November examinations may be ordered after July 1. The notes include past multiple-choice exams and an Introductory Study Note which contains important information about the examination, including any changes to the readings, errata and descriptions of examination formats. If there is any conflict between information contained in the syllabus and that contained in the Introductory Study Note, the latter will govern. Candidate are urged to order the study notes for each part they plan to take.

An order form for these study notes is included on page 63. Included on page 65 is a form for study groups and classes. All correspondence should be with the Society of Actuaries. Questions concerning Study Notes or Study Note orders should be directed to the Study Note Coordinator (SOA) at (708) 706-3525.

(A) APPLIED STATISTICAL METHODS—SOA Course 120

The general scope of this one-and-one-half hour multiple-choice examination is indicated by the following topics:

- Analysis of variance; Regression analysis; Time series analysis.
- Miller, R. and Wichern, D., *Intermediate Business Statistics* (1977), Chapters 4 (up to but not including Tukey’s Test on page 158), 5 (except Section 5.10; including Supplement A), 6, 7, 8, 9, 10 (including Supplements A, B, and C), and 11 (including Supplement A).

Study note available from the Society of Actuaries at a cost of $15.00. (Code 120-001-83.)
(C) NUMERICAL METHODS—SOA Course 135

This subject encompasses various techniques for handling numerical data. Although many of the principles lend themselves readily to computer procedures and methods, knowledge of such procedures or methods is neither presupposed nor required for the examination. The general scope of this one-and-one-half hour examination is indicated by the following topics:

Iteration; Interpolation; Numerical integration; Linear systems.

Burden, R.L. and Faires, J.D., Numerical Analysis (Fourth Edition), Chapters 1 (Sections 1.1*-1.3), 2 (Sections 2.1-2.5), 3 (Sections 3.1-3.4 and 3.6**), 4 (Sections 4.3-4.6), 6 (Sections 6.1-6.7).

Study note available from the Society of Actuaries at a cost of $13.00.

* Knowledge of this section will be assumed as background material for questions; however, questions will not be directly based on this section.

** As related background material for Cubic Splines, the student should read pages 146 and 147 to the paragraph following table 4.1. However, examination questions will not be based on these pages.

PART 3B

INTRODUCTION TO PROPERTY AND CASUALTY INSURANCE

Prior to commencing study for this multiple choice examination, the candidate should read the “Recommendations for Study” section, pages 17 and 18, for study suggestions and guidance in obtaining study notes, out-of-print readings, past examinations, and other information important to sitting for this examination.

The 1992 Study Kit consisting of all of the readings for Part 3b can be ordered from the CAS office at a cost of $55.00. This Study Kit can also be ordered in two sections: 1) The Institute readings at a cost of $40.00 and 2) all other readings marked with an asterisk (*) at a cost of $15.00. The only change in the readings from last year is the replacement of the 6-80 Edition of the Personal Automobile Policy with the 12-89 Edition. Not all of the Institute readings were available as part of the 1991 Study Kit.

Note: Sharing the Risk by Marks and Craigie contains a good basic introduction to insurance. Although this reference is not part of the required readings for Part 3B, the candidate may find it useful to review this material as background for this examination. This reading is available from the Insurance Information Institute at a cost of $9.95.

The insurance policy is the contract describing the services and protection which the insurance company is providing to the insured. It is, in effect, the only “product” which the insurance buyer receives until the time a loss occurs. The candidate should know the policy provisions and the bases of exposure used in the respective lines of insurance, with emphasis on basic coverages and features common to all lines as well as those peculiar to specific lines or types.

The candidate will be held responsible for knowledge of the policy forms (not the associated endorsements) included in the study kit. Manual excerpts should be studied as illustrative of the part played by manuals in the forms, coverages and rating area.

Underwriting is a key function in the insurance business with unique qualities which make it critical to the success of the endeavor. Actuaries will often be working closely with underwriters in their day-to-day operations. The candidate should know what the underwriting function is—its basic purpose, principles and activities.

Product design and product modification are areas in an insurance company's operations in which an actuary may become involved with the marketing function of an insurance company as it relates to pricing, market research, and marketing philosophy. The candidate should be well versed in the responsibilities of the marketing function as well as the basic differences among different marketing systems for insurance products.
Rate making is critical to determining the premium for an insurance policy. The candidate should understand the basic rate making principles.

The settlement of claims determines losses which are the key component for insurance rate making and reserving. The candidate should know how claims are settled, relevant policy provisions and the basic concepts of loss reserving.

Malecki, D.S. Horn, R.D., Wiening, E.A. and Donaldson, J.H., Commercial Liability Risk Management and Insurance (Second Edition), 1986, American Institute for Property and Liability Underwriters, Vol. I pp. 61-112, and 199-346; Vol. II pp. 1-58, 123-193, and 201-229. (As there are errors in the first printing of this edition, the candidate should obtain a later printing. The study kit will contain a list of additions and corrections to the first printing.)

*Insurance Services Office:

4. Commercial General Liability Policy:
   • Occurrence (Edition 11-85).
   • Claims-Made. (Edition 2-86).

*National Council on Compensation Insurance:

5. Workers Compensation Policy (Edition 4-84).

PART 4A

INTEREST AND LIFE CONTINGENCIES

Part 4A is being offered in May and November as a one and one-half hour examination beginning in 1992.

Prior to commencing study for this Part, the candidate should read the "Recommendations for Study" section, pages 17 and 18, for study suggestions and guidance in obtaining past examinations and other information important to sitting for this examination. References are listed in the suggested order for study. Items marked with a dagger constitutes the 1992 Study Kit which is available from the CAS office at a cost of $8.00.

Bowers, N.L., Gerber, H.U., Hickman, J.C., Jones, D.A. and Nesbitt, C.J., *Actuarial Mathematics*, 1986, Chapters 3 (all sections except 3.6), 4 (4.1-4.3, 4.6), 5 (5.1-5.4, 5.6); 6 (6.1-6.3, 6.6), 7 (7.1-7.4), 8 (8.1-8.5), 9 (9.1-9.3). In sections 5.6 and 6.6 the student is not responsible for formulas dealing with *monthly* payments.

PART 4B

CREDIBILITY THEORY AND LOSS DISTRIBUTIONS

Part 4B is being offered in May and November as a two and one-half hour examination beginning in 1992.

Prior to commencing study for this Part, the candidate should read the "Recommendations for Study" section, pages 17 and 18, for study suggestions and guidance in obtaining past examinations and other information important to sitting for this examination. References are listed in the suggested order for study.

Items marked with an asterisk (*) constitute the 1992 Study Kit, which is available from the CAS office at a cost of $15.00.

*Longley-Cook, L.H., An Introduction to Credibility Theory, 1962 (Background only).

Study note available from the Society of Actuaries at a cost of $8: An Introduction to Stochastic Simulation (Code: 130-033-86).

Many actuarial problems involve the analysis of incurred losses for an insured event. Often in practice, the objective may be to find reasonable and usable approximations to the distribution of those losses. The loss distributions text depicts methods for doing this. Chapter 2 and the appendix of this text describe a variety of mathematical distributions. Through study of the required sections, the candidate is expected to become familiar with some uses of these distributions. The candidate will not be tested directly on the distributions themselves; rather the emphasis will be on using them in a problem solving way. Solutions to selected exercises from the text are available at no charge from the CAS office. In order to promote the proper emphasis on the preparation for this examination, the Appendix of Loss Distributions (pp. 217-232) will be provided to students at the time of the examination.
PART 5A

Part 5A is being offered as a one and one-half hour examination. (See Rule 1 of "Rules Regarding Examinations for Admission" for a more complete explanation.)

Only students with credit for Part 5B after the results of the May, 1990 examinations will be allowed to take the Part 5A examination in 1992. In 1992 all other Part 5 students will have to take the entire three hour examination, which is comprised of Parts 5A and 5B.

Prior to commencing study for this Part, the candidate should read the “Recommendations for Study” section, pages 17 and 18, for study suggestions and guidance in obtaining study notes, out-of-print readings, past examinations, and other information important to sitting for this examination.

In studying the references it is recommended that they be read in the order listed.

(1) PRINCIPLES OF ECONOMICS

The candidate will need to have a knowledge of the principles of economics at the college level. The candidate should be familiar with the various key concepts and basic principles of economics included in the recommended reading and be able to explain and apply them.

Samuelson, P.A. and Nordhaus, W.D., Economics (13th Edition), 1989, Chapters 5-8, 9 (pp. 174-186), 10, 11 (pp. 227-231, 237-247), 12, 14, 15 (pp. 324-328), 16-19, 22, 23, 24 (pp. 566-582), 40; exclude appendices except for chapters 16, 19, 23, and 24. (While the candidate will not be tested on chapters 1-4 and 20, the candidate may find it useful to review these chapters as background for this examination. Although no direct question will be taken from these chapters, familiarity with the material may be assumed in testing other chapters.)

(2) THEORY OF RISK AND INSURANCE

The candidate should know what risk is, the kinds of risk, and the ways in which they can be handled, with particular emphasis on the relation to insurance.

PART 5B

FINANCE

Part 5B is being offered as a one and one-half hour examination. (See Rule 1 of "Rules Regarding Examinations for Admission" for a more complete explanation.)

Only students with credit for Part 5A after the results of the May, 1990 examinations will be allowed to take the 5B examination in 1992. In 1992, all other Part 5 students will have to take the entire three hour examination, which is comprised of Parts 5A and 5B.

Prior to commencing study for this Part, the candidate should read the “Recommendations for Study” section, pages 17 and 18, for study suggestions and guidance in obtaining the past examinations and other information important to sitting for this examination.

The item marked with an asterisk (*) constitutes the 1992 Study Kit which is available from the CAS office at a cost of $20.00.

In studying the references it is recommended that they be read in the order listed.

Brealey, R. A. and Myers, S. C., Principles of Corporate Finance (Third Edition), 1988, Chapter 4, 5, 6 (6-1), 7-9, 12 (12-3, 12-4, 12-5), 13, 14, 20, 21, 23, 27, 28, 30 (appendix only), 34, 36; include appendices except for chapters 4, 6, 9, 28. (While the candidate will not be tested on Chapters 1-3, the candidate may find it useful to review these chapters as background for this examination. Although no direct questions will be taken from these chapters, familiarity with the material may be assumed in testing other chapters.)

PART 6

Prior to commencing study for this Part, the candidate should read the "Recommendations for Study" section, pages 17 and 18, for study suggestions and guidance in obtaining the study kit, out-of-print readings, past examinations, and other information important to sitting for this examination.

Items marked with an asterisk (†) constitute the 1992 Study Kit which is available from the CAS at a cost of $70.00. A Study Kit Update is available at a cost of $10.00 which includes the items marked by both a dagger (†) and an asterisk (†).

(a) PRINCIPLES OF RATEMAKING

Section (a) contains readings which describe ratemaking concepts in broad, general principles as well as in specific detail for many lines of insurance. Certain general subjects of particular importance, such as credibility theory, classification and individual risk ratemaking, trend and loss development factors, and liability increased limits ratemaking are addressed in separate papers.

A candidate for this examination should have a thorough understanding of the general, basic principles of ratemaking such that he or she can analyze data given, select an appropriate ratemaking technique and develop a solution to a numerical problem. In addition, the candidate should be familiar with the ratemaking techniques presented in the readings, being able to compare and discuss why certain procedures are applicable to individual lines of insurance, as well as to work numerical problems.

The candidate should also be prepared to discuss specialized concepts in ratemaking, such as trend and loss development, and consider their relationship to changes in the economic environment.

The candidate is not responsible for current, specific developments in ratemaking procedures. However, a study kit is provided which contains portions of rate filings along with pertinent explanatory memoranda. This information is provided so the candidate will be aware of certain current techniques not covered in the various readings. The candidate will be responsible for an understanding of the types of techniques, their application, and how they relate to changes in the economic and social environment.

The following list of topics is typical of those a candidate should be prepared to discuss:

1. The selection and evaluation of ratemaking techniques corresponding to the characteristics of a given line of insurance.
   a. pure premium versus loss ratio,
   b. calendar year versus accident year versus policy year,
   c. credibility, and
d. territorial and classification relativities.
2. Methods for trending and projecting losses and premiums (when appropriate).
   a. internal versus external indices,
   b. relation to loss development,
c. claim cost projection versus current cost index approach, and
d. impact of deductibles, coinsurance, and insurance to value programs.
3. The candidate should also be prepared to discuss and apply ratemaking principles to problems which may not have generally recognized solutions.

Foundations of Casualty Actuarial Science, Published by the Casualty Actuarial Society, 1990, Finger, R.J., "Risk Classification," Chapter 5.

*Study Note Reading: Bouska, A.S.—"Exposure Bases Revisited."

*Study Note Reading: Workers Compensation 1985 State X Rate Filing—Excerpts.

*Study Note Reading: Chernick, D.R.—"Private Passenger Automobile Physical Damage Rate Making."

(b) DATA FOR RATEMAKING

Section (b) includes readings which cover the planning and use of internal statistical material, the compilation and presentation of insurance statistics for statistical and ratemaking purposes, and the sources and uses of external statistics, particularly as they may be required in insurance administration and ratemaking.

The candidate should be familiar with the data captured in the individual statistical plans, being able to compare the different plans, noting limitations and possible areas of improvement. The relationship to the various ratemaking techniques should be noted.

Study Note Reading: Excerpts from Statistical Plans.

Study Note Reading: "Statement of Guidance Regarding Management Data and Information."

Study Note Reading: Policy Year and Calendar Year Calls for Compensation Experience by State as of December 31, 1983.
PART 7

Prior to commencing study for this Part, the candidate should read the “Recommendations for Study” section, pages 17 and 18, for study suggestions and guidance in obtaining study notes, out-of-print readings, past examinations, and other information important to sitting for this examination.

Section (a) of this examination deals with the analytical techniques which an actuary may employ to develop premium, loss and expense reserves. Section (b) deals with the form, content and interpretation of the two major reports an insurance company makes to regulatory authorities and with sources of comparative data.

Items marked with an asterisk (*) constitute the 1992 Study Kit which is available from the CAS office at a cost of $25.00. A Study Kit Update is available at a cost of $5.00 which includes the items marked by both a dagger (†) and an asterisk (*).

(a) PREMIUM, LOSS AND EXPENSE RESERVES

An actuary may be expected to design and test reserving methods, and complete Schedule P of the Annual Statement. The candidate should be prepared to discuss such topics as:

1. The selection and evaluation of a loss reserving method appropriate to a given line of insurance:
   a. For known claims
   b. For IBNR claims
   c. For all incurred claims

2. Testing of adequacy of previous loss and loss expense reserve levels.

3. Evaluating the adequacy of current loss and loss expense reserve levels.

4. The identification of, and correction for, effects on loss reserves stemming from:
   a. Changes in the loss climate
   b. Changes in a company's handling of claims
   c. Data problems

5. Special reserving problems in a line arising from:
   a. Catastrophe losses
   b. Reopened claims
   c. Policies on a claims-made rather than occurrence basis
   d. Fidelity and Surety IBNR
   e. Credit insurance

6. The unearned premium reserve:
   a. Improving its accuracy
   b. The reserve for retrospective returns
   c. Policies on a claims-made basis
   d. Deposit premium policies

7. Allocated loss expense reserves.

8. Unallocated loss expense reserves.

The candidate should be prepared to compare and evaluate the procedures discussed and the arguments advanced in the readings. The answers provided by the candidate will be graded based on their applicability to the specific problem presented and the professional competence evidenced by the answer. While the readings for this part provide the basic factual information necessary, practical experience has often proven helpful in successfully completing the examination.

Readings

Those pages and schedules of the Association form of the 1991 Annual Statement Blank for Fire and Casualty Companies which relate to reserves.

†Office of the Superintendent of Financial Institutions Canada, “Report of the Actuary or the Reserve Specialist on the Property and Casualty Business of 1990 Pursuant to the Provisions of the Canadian and British Insurance Companies Act or the Foreign Insurance Companies Act.” (Section 3 will not be tested.)

Salzmann, R.E., Estimated Liabilities for Losses and Loss Adjustment Expenses, 1984, Chapters 1-3, 6 and 11.

AICPA, "Discounting Claims of Insurance Enterprises."

(b) INSURANCE ACCOUNTING EXPENSE ANALYSIS, AND PUBLISHED FINANCIAL INFORMATION

The candidate should obtain a general knowledge of insurance accounting, including its terminology and practice. A suggested basic accounting reference for candidates is the American Institute for Property and Liability Underwriters' CPCU 8 text, *Introduction to Accounting*, by A. Thompson Montgomery. A suggested basic overview of insurance accounting is *Basic Concepts of Accounting and Taxation of Property/Casualty Companies*, a monograph by the Insurance Information Institute. The candidate should have detailed familiarity with the contents, purpose, and recent changes in the Annual Statement Blank and the Insurance Expense Exhibit. This includes a knowledge of the methods of preparation and interrelationships of the various exhibits, schedules, and parts comprising these reports. Instructions for preparation of the Annual Statements are available from the NAIC. Examination questions regarding preparation of the Annual Statement will not require the candidate to purchase the instructions. The candidate should understand the details of and reasons for the differences between the accounting methods employed under statutory and GAAP accounting. The candidate should also understand the differences between the statistics included in these reports and those used for ratemaking and the various types of experience analysis. The candidate should be able to interpret and evaluate data from the reports, identify potential distortions in the data, and suggest possible means of adjusting for any distortions.

Readings

(1) Insurance Accounting

Association Form of 1991 Annual Statement Blank for Fire and Casualty Companies (both individual and consolidated basis).

Strain, R.W., *Property-Liability Insurance Accounting* (Fourth Edition), 1988, Chapters 1, 2, 3, 6, 7, 8, 10, 11, 12, 14, 15, 16, and Appendices.

(2) Expense Analysis
1991 Insurance Expense Exhibit.

New York State Regulations, Title 11, Parts 105 through 109 (Regulation 30). (Available from CAS Library.)

(3) Published Financial Information
The candidate should be familiar with the sources of published insurance statistics in order to know where to obtain such information when the need arises. The following annual publications constitute a representative list of such sources:

Best, A.M., Co., Inc.
Best's Insurance Reports—Property/Casualty
Best's Aggregates and Averages—Property/Casualty
Best's Executive Data Service
Best's Key Rating Guide—Property/Casualty
Best's Casualty Loss Reserve Development Series

The National Underwriter
Argus F.C.&S. Chart
Argus Chart of Health Insurance

New York Insurance Department. Statistical Tables from Annual Statements.

FELLOWSHIP EXAMINATIONS
PART 8

Prior to commencing study for this Part, the candidate should read the "Recommendations for Study" section, pages 17 and 18, for study suggestions and guidance in obtaining study notes, out-of-print readings, past examinations, and other information important to sitting for this examination.

In each section, there is a body of core material for which each student will be responsible. The remaining material in the section is divided according to the country, either the United States or Canada, for which it is primarily relevant. The student may choose to be tested on either the material designated Canadian or the material designated as United States and must declare this choice at the time of registration. All students will be tested on the core material. A circle is shown beside the United States material and a diamond is shown beside Canadian material.

The candidate should be prepared to answer questions regarding current developments in subjects covered by this examination. A list of potential current events topics will be available by January 15. It will be provided to those students who have already registered by that date. If you plan to register after this date but wish to receive the current events topics as soon as they become available, please write or FAX, but not call, the CAS office. The time frame for current events covers those issues appearing in periodicals that are published from January of the year prior to the examination through March of the year of the examination. However, answers based on more recent information will be acceptable.

- The candidate should read all issues of the following publications:
  1) Business Insurance

- The candidate should read general property and casualty insurance periodicals or general business publications which cover property and casualty insurance.

Items marked with an asterisk (*) constitute the 1992 Study Kit which is available from the CAS office at a cost of $40.00. It contains some U.S. and Canadian specific material.

(a) TORT LAW AND STATUTORY INSURANCE
Legal foundations of tort law and statutory insurance are subjects which are not strictly actuarial in nature, but which affect many areas of an actuary's work. Since no prior legal knowledge is assumed, the first section includes several readings on tort law. This material should provide background and a basic understanding of how tort law gives rise to the need for insurance.

- United States content
- Canadian content
The background material is followed by a study of insurance coverages mandated by statute. In reviewing the recommended readings the candidate should be aware of the modifications of tort law with the introduction of various "first party" compensation systems. These first party systems are exemplified by the Automobile No-fault and Workers' Compensation coverages. Statutory coverages include those mandated by the state/province and those required by the federal government. State/province mandated coverages may include automobile, workers' compensation and employers' liability coverages. For automobile insurance, the candidate should be aware of the different legal environments presented by different states/provinces including financial responsibility or compulsory insurance laws and various involuntary market mechanisms. The large variety of individually tailored state or provincial laws in workers' compensation makes this area particularly complex, but the candidate should understand the basic concepts and structure common to the diverse state or provincial statutes.

Finally, coverages required by the federal government or social insurance plans are presented. The candidate is expected to be familiar with the basic principles and concepts underlying the Social Security system in the United States or the social insurance systems in Canada and with the general actuarial principles involved in the valuation of these systems. One is not expected to have detailed knowledge of the current level of benefits or the formulas used to calculate such benefits.

(1) Background Law and Insurance

Waddams, S.M., *The Law of Damages*, 1983, Chapter 3. (The candidate will not be tested on details of cases mentioned only briefly, but will be responsible for knowledge of cases treated in some depth.)

(2) Statutory Insurance

(A) Automobile Insurance

a. No-Fault Benefits
b. Add-On Benefits
c. Compulsory Liability, Financial Responsibility, and Uninsured Motorists Laws
d. Residual Market Plans

(B) Workers' Compensation

++Chamber of Commerce of the United States, *Analysis of Workers' Compensation Laws*, 1991. (Although the candidate is not expected to memorize the detail of this reading, he or she should be familiar with the contents thereof and the coverages described.)

*Neal, J., *Canadian Workers' Compensation*.

(C) Government Programs

Tate, H., *The Canada Pension Plan*.

Coward, I.E., *Provincial Hospital and Medical Insurance Plans*.

Bedard, M. *Canadian Unemployment Insurance*.

(b) REGULATION AND REGULATORY CONCERNS

This Section includes readings covering both the fundamentals of insurance regulation and a discussion of important issues that confront a regulator.

The candidate should understand the role of the insurance business as a supplier of an essential service. Because of the essential and highly technical nature of insurance, a system of regulatory controls has been established to require the industry to demonstrate that it is providing fair and reliable service.

The basis for insurance regulation is the law of the particular jurisdiction: either state, provincial, or federal. The New York Insurance Law and various Canadian laws are included as typical laws that have evolved over time. In both the background material and in the law itself, the candidate should concentrate on those concepts of law which relate to the insurance contract, to the conduct of the business of insurance, and to the way insurance is marketed.

Judicial decisions interpreting the law are also an important component of insurance regulation. Several readings summarize significant cases which served to develop legal precedents.

In recent years, several reports have been issued examining the role of governments in insurance regulation. Excerpts from these reports are included on the syllabus so that the candidate can understand the unique nature of a state/province regulatory system, insurance's antitrust immunity and proposals for change in this immunity.

The candidate should be familiar with the major changes in rate regulation and the various approaches currently in use. The candidate should consider how well each style of rate regulation meets the basic objectives of regulation: insurer solvency, availability of insurance, and fair treatment of policyholders and claimants.

The candidate should be familiar with a wide range of issues that attract the attention of regulators: rate making, classification, shared markets, availability of insurance, insurer profitability, monitoring for solvency, guaranty funds (limiting the harmful effect of solvency if monitoring does not prevent it), insurance groups, policy language and unfair competition. The candidate should not only understand the importance of such areas for regulators but also the methods that are used to achieve regulatory goals. The candidate may gain a better understanding of the solvency tests used, by reviewing the NAIC publication entitled, "Using the NAIC Insurance Regulatory Information System," Property and Liability edition, 1989, but will not be held responsible for its contents.

The National Association of Insurance Commissioners is the central body of all state regulation. The NAIC meets regularly to consider current issues of concern. Typically, a task force and an advisory committee are established to make recommendations to a full committee and to the NAIC itself. These recommendations often take the form of a model law to be enacted by each affected state.

The candidate will be responsible for the following topics as found in the NAIC Proceedings of 1990 Volumes 1A, 1B and II and 1991 Volumes 1A, 1B and II:

i) Risk-Based Capital
ii) Guaranty Funds
iii) Risk Retention Groups

The topics are to be found in the minutes of the following committees, sub-committees, task forces, etc.

I) Financial Conditions (EX4) Subcommittee
   a) Examination Oversight Task Force
      Risk-Based Capital Working Group, Property and Casualty Subgroup
   b) Guaranty Fund Task Force (Property and Casualty topics only)
II) Commercial Lines—Property and Casualty Insurance (D) Committee
    a) Risk Retention Working Group

(1) Introduction to Regulation

Joskow, P.L., "Cartels, Competition and Regulation in the Property-Liability Insurance Industry."

Mintel, J., Insurance Rate Litigation, 1983, Chapter 5, 7. (The candidate will not be tested on details of cases mentioned only briefly, but will be responsible for knowledge of cases treated in some depth.)

Mertz, A.C., The First Twenty Years.

(2) Rating Making (including Classification and Profitability)

Mintel, J., Insurance Rate Litigation, 1983, Chapter 1, 8, 10, 11 and 13.

• United States content
• Canadian content

- New York (State) Laws, Statutes, etc., New York Insurance Law, Article 1, Section 107, Article 23 (all sections). (The candidate is responsible only for the sections of the law as stated. If studying from publications such as the Consolidated Laws Service, which cite case histories as well as the law itself, the candidate is not responsible for the case histories although they may be helpful in gaining an understanding of the law. Candidates will not be tested on those sections of the New York Laws dealing exclusively with life insurance and/or annuities.)

- *Ontario Motorist Protection Plan*, (Bill 68), Explanatory notes, Sections 31, 37, 39, 45, 48, 49, 52, 55, 56, 57 (excluding subsection 234), 61, 63, 74 and Accident Benefit Schedule, Parts II-VII.
- *Quebec Automobile Insurance Act*, Title VII.

(3) Shared Markets and Availability

---

(4) Solvency Monitoring and Guaranty Funds

*New York Insurance Law, Sections 1301, 1302, 1303, 1305, 1308, 1309, 1310, 1311, 1414, 4117.*

*Canadian and British Insurance Companies Act*, Parts III and VI.

(5) Other Issues

- United States content
- Canadian content
PART 9

Prior to commencing study for this Part, the candidate should read the “Recommendations for Study” section, pages 17 and 18, for study suggestions and guidance in obtaining study notes, out-of-print readings, past examinations, and other information important to sitting for this examination.

Items marked with an asterisk (*) constitute the 1992 Study Kit which is available from the CAS office at a cost of $50.00. A Study Kit update is available at a cost of $3.00 which includes the items marked by both a dagger (†) and an asterisk (*).

(a) ADVANCED RATEMAKING

Candidates for this part are expected to have acquired considerable technical knowledge and practical experience in insurance ratemaking. The examination will assume a working knowledge of basic ratemaking and will deal with advanced problems such as those covered in the papers listed below. The examination will not necessarily be limited to the excerpts expressed in the listed papers. The ability to apply ratemaking knowledge and experience may be tested through questions dealing with problems for which there are no generally recognized solutions. To some degree, they will deal with the types of practical problems which a fully qualified actuary working in ratemaking should be able to solve.

Advanced ratemaking consists of two principal sections: (1) classification ratemaking topics and (2) excess and deductible rating.

All the papers in this part should be read for illustrations of basic principles and theories, as well as any insights into advanced ratemaking problems and their solutions. In none of the papers is the derivation of formulas or equations to be stressed, but some applications of those techniques may be required. Some papers are included primarily for their historical significance or to illustrate unique solutions to a ratemaking problem.

(1) Classification Ratemaking Topics

Cummins, J.D. Smith, B.D., Vance, R.N., and VanDerhei, J.L., Risk Classification in Life Insurance, 1985, Chapters 3-6. (The student is not responsible for mathematical proofs.) (The student may purchase this book from CAS Office for $60.00.)

Insurance Services Office: Study Note on Monoline-Multiline Ratemakings, included in Study Kit.

American Academy of Actuaries Committee on Risk Classification, “Risk Classification Statement of Principles,” June 1980. (Available from the American Academy of Actuaries at no charge.)

†Foundations of Casualty Actuarial Science, Published by the Casualty Actuarial Society, 1990, Venter, G.G., “Credibility,” Chapter 7 (pp. 375-431). (The student is not responsible for mathematical proofs, and is not responsible for the topic of diffuse priors. Note errata sheet in Study Kit.)

(2) Excess and Deductible Rating

This section deals with various techniques for risk sharing between an insured and an insurer.

The candidate should have a general knowledge and understanding of deductible and excess coverages, and the problems inherent in pricing these coverages for various lines.

†Hogg, R.V. and Klugman, S.A., Loss Distributions, 1984, Chapter 5 (5.3-5.6A). (Students may need to review sections included in Part 4 readings. Also, note errata sheet in Study Kit.)

(b) INDIVIDUAL RISK RATING

One of the most important functions performed by an actuary is the rating of individual risks. Prior to Part 9, most of the readings were addressed to group or classification risk rating. This part provides detail readings on individual experience risk rating so that the candidate will be prepared to design and manage an individual risk rating system.

Individual risk rating consists of two principal sections:

1) Prospective rating which is more commonly known as Experience rating.

2) Retrospective rating.

The readings range from those which discuss the theoretical foundation of individual risk rating to those which discuss the application of various plans.

The candidate will be expected to have a good working knowledge of credibility, loss limitation, and rate modification concepts as they apply to prospective and retrospective rating, and loss distribution, insurance charge and excess loss charge concepts as they apply to retrospective rating. The candidate can be expected to apply these concepts in a creative and problem solving manner.

The candidate is also expected to be knowledgeable in the application of individual risk rating plans currently in use (excluding individual state pages) and should anticipate answering questions in the manner of an insurance consultant for an insured. It is realized that parts of some technical articles cited in the recommended reading for this part are not current. However, the candidate should study all articles for their explanation of theory.

(1) Experience Rating

Snader, R.H., “Fundamentals of Individual Risk Rating and Related Topics,” Part I of Study Note. (Updated by Gillam, W.R., and Bear, R.A.; included in Study Kit.) (The student is not responsible for the material pertaining to Perryman's second formula.)

The candidate should study the following rating plans and the forms used in the application thereof:

†National Council on Compensation Insurance:

- Experience Rating Plan (as of July 1, 1990).

†Insurance Services Office: Experience and Schedule Rating Plans applicable to General Liability, ISO Circular GL-90-217 (Conversion to Loss Cost Basis).

†Foundations of Casualty Actuarial Science, Published by the Casualty Actuarial Society, 1990, Venter, G.G., “Credibility,” Chapter 7 (pp. 431-436, 442-457, 460-462). (The student is not responsible for mathematical proofs, and for the topic of Diffuse Priors. Note errata sheet in Study Kit.)

(2) Retrospective Rating

The candidate should study the following retrospective rating plans and the forms used in the application thereof:

National Council on Compensation Insurance:

Insurance Services Office:

Lee, Y.S., “The Mathematics of Excess of Loss Coverage and Retrospective Rating—A Graphical Approach,” Section 4 PCAS LXIV, 1988, p. 64. (The student is not responsible for “Other Applications” on pp. 75-76.)
PART 10

Prior to commencing study for this Part, the candidate should read the “Recommendations for Study” section, pages 17 and 18, for study suggestions and guidance in obtaining study notes, out-of-print readings, past examinations, and other information important to sitting for this examination.

The candidate should be prepared to answer questions regarding current developments in subjects covered by this examination. A list of potential current events topics will be available by January 15. It will be provided to those students who have already registered by that date. If you plan to register after this date but wish to receive the current events as soon as they become available, please write or FAX, but not call, the CAS office. The time frame for current events covers those issues appearing in periodicals that are published from January of the year prior to the examination through March of the year of the examination. However, answers based on more recent information will be acceptable.

The candidate should read all issues of three publications such as:

1) Business Insurance

3) Best’s Review—Property/Casualty Insurance Edition

Part 10 represents the final step in the examination process and is designed to test both the breadth and depth of the candidate’s understanding of the insurance process. The candidate is expected to have acquired considerable technical knowledge and practical experience during preparation for the previous examinations.

The required reading material for this examination is divided into four sections, much of which builds on information covered in previous examinations. Questions may be asked which require use of material mastered in preparation for these previous examinations.

Items marked with an asterisk (*) constitute the 1992 Study Kit which is available from the CAS Office at a cost of $35.00.

(a) FINANCIAL OPERATIONS OF INSURANCE COMPANIES

This section explores the relationships between insurance concepts, such as underwriting profits, premium-to-surplus ratios, and investment income, and financial concepts, such as interest rates, inflation rates, cost of capital, and risk premiums. The effects of federal income taxes on insurance operations are also examined.
The readings may be grouped into four categories. (A) The Ferrari, Brubaker, and D'Arcy readings discuss the primary concepts and demonstrate the major relationships. (B) The two readings by Butsic deal with inflation rates and discount rates, both for insurance profits and for loss reserves. (C) The Myers & Cohn, D'Arcy & Doherty, and Feldblum readings present financial pricing models that are currently used in the insurance industry. The candidate should pay particular attention to two questions: (i) "How do these pricing models differ from each other? For instance, how does a net present value model differ from an internal rate of return model?" (ii) "Whose point of view is represented by each model—that of the insurer, the regulator, the policyholder, or the equity provider?" (D) The Strain and Almagro & Ghezzi readings provide an overview of federal income tax law applicable to insurance companies, as well as a model for combining underwriting and investment strategy.

The candidate may find the Part 5B readings useful background for the Part 10A material. The textbook by Brealey & Myers is important particularly for the Ferrari and Butsic readings. The article by Mullins is helpful for the Myers & Cohn and the D'Arcy & Doherty readings, both of which deal with the Capital Asset Pricing Model. The article by Butler & Appel relates to the Feldblum reading. None of the Part 5B readings will be tested on the Part 10 examination.

Feldblum, Shloim, "Pricing Insurance Policies: The Internal Rate of Return Model," included in Part 10 Study Kit.

(b) REINSURANCE

This section deals with various techniques for risk sharing between an insurer and a reinsurer.

The candidate should have a general knowledge and understanding of the various types of reinsurance, the purpose and/or function of each type, reinsurance programs, reinsurer underwriting, the effects of reinsurance transactions on company operating results and other financial information, as well as methods employed to analyze costs.

†Strain, R.W., (Editor) Reinsurance, 1980, The College of Insurance, Chapters 3, 9, 12.

(The student may find the following companion book helpful in preparing for this material: Reinsurance Practices—A Workbook with Cases, R.W. Strain, Editor, The College of Insurance, 1982. No questions will be taken directly from this workbook.)

††Ludwig, S.J., "An Exposure Rating Approach to Pricing Property Excess of Loss Reinsurance."

†AICPA, "Reinsurance Auditing and Accounting Task Force, Guidance for Assessing Risk Transfer in Property and Liability Reinsurance Contracts, Draft 910911."

(c) FORECASTING

In addition to employing forecasting techniques in both ratemaking and reserving, an actuary may be expected to develop both short and long range forecasts, and to play a key role in the corporate planning process of an insurance company. This section is designed to familiarize the candidate with various techniques employed in forecasting and planning. It is intended to provide an understanding of the advantages and disadvantages of various forecasting methods, how to interpret statistical measures in evaluating various techniques, and the assumptions underlying each.

Makridakis, S. and Wheelwright, S.C., *Forecasting Methods for Management* (Fifth Edition), 1989, Chapters 1-2, 4-7, 10, 15, 17, 20. (Candidates are presumed to be familiar with the material on regression in chapters 8 and 9, which is also covered in the Miller and Wichern text on Part 3a-SOA Course 120.)

(d) VALUATION TOPICS

This section presents an introduction to several concepts involved in the valuation of insurance companies. The candidate is expected to develop an understanding of the various techniques presented in the readings and be able to apply these techniques in a problem-solving situation. Since the concept of valuation is a developing area of actuarial practice, the candidate should be prepared to compare and evaluate the procedures discussed and the arguments advanced in the readings.

INDEX TO TEXT REFERENCES

Text references marked with an asterisk(*) are available through the library of the Casualty Actuarial Society. The following information is furnished for those who wish to purchase the other text references, cited in the examination part descriptions.
