CAS’s Mission, Vision and Core Values

Mission Statement
The purposes of the Casualty Actuarial Society are to:

- Advance the body of knowledge of actuarial science applied to general insurance, including property, casualty and similar risk exposures.
- Expand the application of actuarial science to enterprise risk and systemic risks.
- Establish and maintain standards of qualification for membership.
- Promote and maintain high standards of conduct and competence.
- Increase the awareness of actuarial science.
- Contribute to the well-being of society as a whole.

Vision Statement
Actuaries are recognized for their authoritative advice and valued comment wherever there is financial risk and uncertainty.

### CAS Members by Type of Employment

- **Property-Casualty Insurance** 50%
- **Consultants** 13%
- **Service Orgs.** 11%
- **Reinsurance** 8%
- **Retired** 8%
- **Brokers & Agents** 2%
- **Other** 5%
- **Government** 2%
- **Academic** <1%
- **Life, Accident and Health Insurance** 1%
Diversity

In 2019, the Joint Committee for Inclusion, Equity and Diversity (JCIED) was created as a partnership between the Casualty Actuarial Society and the Society of Actuaries. The purpose of the committee is to advise on and oversee inclusion and diversity strategy, in line with organizational strategy of both the SOA and CAS, for the actuarial profession in the geographies and practice areas we serve.

The CAS’s diversity strategy formalizes our commitment to facilitating the evolution of a multidimensional property-casualty actuarial profession. One goal of the strategy is to increase the membership of underrepresented groups in the CAS. To measure progress on membership diversity, the CAS monitors current membership demographics by ethnicity and gender.

### 2019 CAS Membership by Ethnicity

- Non-Hispanic White: 72%
- Asian: 23%
- Black or African-American: 1%
- Hispanic or Latino: 2%
- Some Other Ethnicity: 2%

### 2019 CAS Members by Gender

- Male: 69.0% (2019), 69.5% (2018), 69.8% (2017), 70.1% (2016), 70.5% (2015)
- Female: 31.0% (2019), 30.5% (2018), 30.2% (2017), 29.9% (2016), 29.5% (2015)
Volunteerism

CAS members value our community and the relationships formed through volunteer activities. In FY 2019, 2,879 out of 8,973 CAS members served as volunteers. That's 32.1% of the membership! Volunteer contributions spanned the entire range of CAS activities, including examinations, research and development, and educational programs. The CAS is grateful for the continued support of employers who encourage their actuaries to volunteer their time and effort to the CAS. We are proud to recognize some of these employers.

Total Exam Registrants 2015-2019

- Exams MAS-1, MAS-2, 5, 6C, 6U, 7, 8, 9
- Exams S, 5, 6C, 6U, 7, 8, 9
- Exams LC, ST, S, 5, 6C, 6U, 7, 8, 9

* Exams MAS-1, MAS-2, 5, 6C, and 6U are given twice a year.
** In 2018 we offered only MAS-1 in the spring and both MAS exams in the fall.

The CAS Path to Success

In principle and practice, the CAS is the gold standard for the property-casualty actuarial profession. With 100 years of experience and expertise, the CAS continues to focus on comprehensive exams and education that are uniquely relevant to property-casualty actuaries. Our CAS credentialing program is the program of choice for attracting top candidates and meeting employers’ needs.
University Engagement

The CAS expanded its support for universities in 2019 through its membership programs, CAS Student Central and CAS Academic Central. Student membership increased by 13% percent, reaching 8,951 members at 955 universities, and academic membership increased to 488 members at 247 universities.

CAS University Award Program

The Casualty Actuarial Society (CAS) awarded three universities the 2019 CAS University Award, an honor created to recognize schools doing exemplary work in preparing students for a career in the property and casualty insurance industry. The schools honored includes:

- Illinois State University
- University of Connecticut
- University of Toronto

Participation in University Events

In 2019, the CAS was represented by staff and volunteers at more than 100 in-person events for university students across the world, ranging from career fairs and student conferences to presentations at student clubs and university classes.
CAS Student Programs

The CAS hosted approximately 115 university students at five different student programs held in conjunction with 2019 CAS meetings and seminars.

CAS Trust Scholarship

The CAS Trust Scholarship Program, funded by donations to the CAS Trust, awards up to three scholarships to deserving students annually. The First Place Winner receives a $10,000 scholarship. The Second and Third Place Winners, if chosen, are each awarded a $5,000 scholarship.

The objective of the scholarship is to further students’ interest in the property-casualty actuarial profession and to encourage the pursuit of the CAS designations.

Each year, the three recipients of the scholarship are recognized at the CAS Annual Meeting in November. In 2019, Tommy Anderson of the University of St. Thomas was awarded $10,000, and Jack Richards of Drake University and Cason Wight of Brigham Young University were awarded $5,000 each. All traveled to Honolulu for the event, and each are pictured below with CAS President Jim Christie.
Meetings and Seminars

The number and variety of CAS offerings represent an ongoing expansion to respond to member demand for high-quality, affordable continuing education opportunities. A total of 3,778 people attended the six largest CAS meetings and seminars in FY 2019.

Awards and Recognition

Excel Awards for Actuarial Review and social media campaigns

The CAS was honored for exemplary work over the past year, garnering three coveted EXCEL Awards for marketing and communications projects including the social media campaigns for Actuaries in Pop Culture and the 2018 CAS Annual Meeting, as well as the Actuarial Review feature article “Driverless Utopia.” The EXCEL Awards, hosted by Association Media & Publishing, recognizes excellence in nonprofit association marketing and communications. Winners of the highly competitive contest, which received over 750 entries in 2019, were honored at the EXCEL Awards Gala on June 24, 2019 in Washington D.C.

The awards include:

A bronze award in the category of “Magazine Feature Article” for “Driverless Utopia” Actuarial Review

“Driverless Utopia” headlined the May-June 2018 issue of Actuarial Review, which was the most viewed issue of the year on the magazine’s website. Written by frequent AR contributor Annmarie Geddes Baribeau, the article combines engaging graphic elements with thought-provoking editorial content to examine a world caught between available technology and public perception.

A gold award in the category of “Social Media Campaign (Other)” for Actuaries in Pop Culture

Over the course of a week-long campaign, the CAS shared some of the best actuary pop culture references from a variety of media on social media platforms using the hashtag #ActuariesinPOP. The content was delivered via customized graphics inspired by pop art to mirror the pop culture theme.

A gold award in the category of “Social Media Campaign (Event/Convention)” for the 2018 Annual Meeting

The 2018 #CASAnnual campaign was executed on a variety of social media platforms before, during and after the meeting in November 2018 and included elements such as a social media toolkit for speakers, a daily Twitter contest for attendees and a custom Snapchat filter.

Data Sources of the Future Tie Carriers Closer to Customers

Katey Walker, FCAS, CSPA, discusses how P&C companies are tapping into new data sources such as telematics and social media.

For the NFL and all of football, a new threat: an evaporating insurance market

This ESPN article features content from a 2018 CAS Annual Meeting session exploring the various insurance implications involved with CTE and other brain injuries.
Developing a High-Performing Data Science Team

Shane Barnes, FCAS, provides guidance to leaders on how to build diverse data science teams that can effectively leverage analytics.

Restrictions on auto insurance rating variables could shrink private coverage

Taking away insurance companies’ use of driver traits they factor in to set premium prices could shrink the insurable population and force the riskiest motorists into pricey, state-assigned pools, an actuarial researcher said.

Many states already restrict the personal “rating variables” that car insurers can use to determine which drivers are riskier and should pay higher premium rates and which should be considered safer and charged less. The past few years have seen more such restrictions proposed, including California’s rule eliminating gender as a rating variable and a proposal on the federal level that would restrict the use of credit scores.

The Casualty Actuarial Society believes the trend threatens to reverse the progress private auto insurance companies have made in the past 20 years offering coverage for all drivers no matter their driving history. The rise in coverage followed the acceleration of the use of rating variables, which gave companies more insight and made them more willing to take on risks they previously considered uninsurable, said Ken Williams, an actuary with the society who co-authored a white paper on the topic with the Insurance Information Institute.

CAS Staff Actuary Ken Williams, FCAS, discusses some of the consequences that can result from restricting rating variables.

ADAS Cuts Risk But Still Raise Insurers’ Costs

Roosevelt Mosley, FCAS, CSPA, explores ongoing liability implications as autonomous vehicle usage continues to grow.

Best Cities to Avoid Natural Disasters

Doug Collins, FCAS, was interviewed on the Weather Channel about climate change and the best cities in the U.S. to avoid natural disasters.

Students and Actuarial Candidates Invited to Apply for a 2019 OLA Travel Award to Attend an Upcoming Conference! - CA...
Each year the CAS’s many publications enlarge the abundance of actuarial literature.

**CAS Monograph Series**

The CAS Monographs Series are peer-reviewed, authoritative works that encompass significant subjects in casualty actuarial science. In 2019 the series posted a second edition of its first monograph, “Stochastic Loss Reserving Using Bayesian MCMC Models,” by esteemed author Glenn Meyers.

**Actuarial Review**

*Actuarial Review* is an in-depth actuarial news source for CAS members and candidates who want to know the latest in science and technology, business ethics and professionalism, as well as the achievements of CAS members and committees. In 2019 *AR* included stories affecting the P&C insurance market — marijuana legalization, the top five emerging risks, commercial auto profitability, and Generation Z’s potential impact on personal lines.

**Variance**

*Variance*’s mission is to disseminate practical and theoretical research of interest to casualty actuaries worldwide. In 2019 the CAS published *Variance* 12:2, a robust volume examining possible enhancements to traditional actuarial issues and techniques, as well as papers on topical subject matter — cyberrisk, infrastructure service contracts, bookmaker solvency and climate risk.

**Future Fellows**

*Future Fellows* is a vital publication for those taking CAS Exams. This quarterly newsletter, produced in print and online, gives CAS Candidates access to all they need to know about examinations, study methods, career development and continuing education.

**CAS Educative Statements**

In 2019 the CAS released a new type of publication, CAS Educative Statements, that are intended to educate the public and to ensure that policymakers, the media and the public have sound, objective information on property-casualty insurance issues. The first Educative Statement, “Insurance Rating Variables: What They are and Why They Matter,” was written in partnership with the Insurance Information Institute.

**CAS E-Forum**

In 2019 the CAS E-Forum posted several reports of CAS Research Working Parties: reports 13, 14, and 15 of the Risk-Based Capital Research; Predictive Analytics in Capital Modeling; and Insurance On Demand. A host of independent research were also published, as well two call paper programs on nontechnical reserving and traditional reserving.

Catastrophe Risk Management Credentials Offered

The first two examinations were released for the Certified Specialist in Catastrophe Risk (CSCR), a base level credential that demonstrates a thorough understanding of essential catastrophe risk principles. This credential, offered through our partnership with The International Society of Catastrophe Managers (ISCM), consists of four exams and an online ethics and professionalism course. The remaining two CSCR exams are on track to be released in 2020.

An Experienced Industry Profession (EIP) pathway to earn the Certified Catastrophe Risk Management Professional (CCRMP) designation — an advanced credential that recognizes the essential knowledge and mastery of the application of the principles and analytics of catastrophe risk management — was opened in 2019. The CCRMP was awarded to 13 catastrophe risk management professionals.

CSPA Credential Awarded to Nine Candidates

The final assessment for the Certified Specialist in Predictive Analytics (CSPA) credential — a case study project that demonstrates a candidate’s ability to apply the knowledge and skills covered in the first three courses — was first offered in 2019. The CSPA was awarded to 45 new recipients in 2019, bringing the total number of CSPAs awarded to 252.

The CAS Institute honored the newest recipients of its CSPA credential during the 2019 CAS Ratemaking, Product and Modeling Seminar in Boston, Massachusetts. More than 40 new CSPAs in attendance were recognized for this achievement.

Third Annual iCAS Community of Practice Event

The CAS Institute held its third Predictive Analytics Community of Practice Event on Monday, March 26, 2019. More than 30 iCAS members discussed a variety of topics, including:

- “Unpacking the Black Box,” presented by Chris Cooksey.
- “Model Deployment with R: A SQL Approach,” presented by Chengjun Hou.
- “Topics in Data Preprocessing Using R,” presented by Louise Francis.

Attendees received an update on iCAS from iCAS President Joanne Spalla and heard from CE Committee Chair Mike Woods.

Activities with Others

In February iCAS partnered with the Canadian Institute of Actuaries (CIA) and the Society of Actuaries (SOA) to present a “Predictive Analytics Seminar” in Toronto, which drew more than 135 attendees. CAS President Jim Christie was part of the opening panel, together with CIA President Elect Marc Tardif and SOA Past President Mike Lombardi.
